

Sep 2008 to Jan 2010 Employer: **London Offshore Consultants, Singapore**
Position: Senior Marine Engineering Consultant

Undertaking a number of inspections for various clients including owners, underwriters and charterers. These surveys have included main and auxiliary machinery damage, collisions and investigations into equipment failure. In addition I have undertaken a range of condition and suitability surveys.

Surveys carried out on the following:-

- Dispute between Charterers & Owners
- Damage to high pressure boiler drum and stator during loading
- Ultrasonic testing of newly converted hatch covers
- Shipyard dispute regarding delivery status of vessel.
- Shipyard dispute regarding main engine.
- Assessment and progress of rig modules.
- Investigation & repair of ships crane.
- Main engine starting problem
- Main engine crankshaft failure
- Main engine dispute with shipyard
- Various collision surveys
- P&I condition surveys
- Tanker suitability condition surveys
- Fuel Consumption Dispute
- Main engine damage due to cargo contamination
- Investigations into inert gas generator problems
- Hull repair and cargo transfer following collision
- Vessel's performance problems
- Shipyard delivery dispute
- Various condition and voyages surveys
- Recurring main engine problem
- Damage inspection and repair feasibility of FPSO
- Condition and suitability of passenger vessel

Jul 2006 to Sep 2008 Employer: **Aalmar Surveys Ltd**
Position: Surveyor/Manager

Arranging and carrying out Sale and Purchase Surveys on behalf of prospective buyers. Undertaking reviews of Classification Society Records and monitoring both S & P and Class records carried out by non-exclusive surveyors employed by Aalmar Surveys.

Carrying out "in house" training in the use of Ultrasonic testing of hatch covers.

- 2003 to Jul 2006 Returned to British Marine Managers as a staff surveyor carrying out risk assessment inspections, safety audits and damage surveys on a wide range of vessels including fishing boats.
- Jun to Dec 2005 Acting head of Survey Department in the absence of the Chief Surveyor. Fulfilling his role with regard to the continued running and maintaining the efficiency of the department.
- Organizing and arranging for surveys to be carried out world wide as required by Underwriters.
- Reviewing assessing and reporting on the outcome of the survey reports. Monitoring the progress of such reports with regard to the completion and compliance of items identified during the loss prevention surveys, which required corrective action.
- Reviewing Damage and Claims Reports for the Claims Department and providing technical advice and assistance as required.
- Carrying out fleet and Management reviews at the request of Underwriters.
- Working as an integral part of a survey team, including the management of the Survey Department in the absence of the Chief Surveyor. Providing guidance to other members of the Survey Department as and when required and ensuring that the necessary procedures are adhered to.
- Delivering training seminars on risk assessment and loss prevention.
- 2002 to 2003 Superintendent Engineer / New Build Superintendent with Sea Lion Shipping. Responsible for the day to day operation of 6 Off-Shore Supply vessels working worldwide.
- Overseeing the construction and commissioning of a new platform supply vessel. This work also involved a close working relationship with the Classification Society and Flag State Surveyors.
- This involved the witnessing of the preparation, painting and coating of various cargo tanks, designed for the carriage of mud, brine and potable water. Prior to the commencement of this work I attended an introductory course at paint manufacturers International Paints.
- 2000 to 2002 Superintendent Engineer with R. Laphorn and Company, with responsibility to the Technical Director for the running and maintenance of 24 ISM certificated small cargo vessels. Planning and organizing routine and emergency dry dockings, fleet repairs and implementation of a planned maintenance system.
- Organizing and supervising the renewal of both Special and Annual surveys for Class and the Flag State Authority.
- Arranging for damage repairs to be carried out, then correlating and compiling repair schedules for submission to insurers.

- 1993 to 2000 Staff Surveyor with, British Marine Mutual Insurance Associate Ltd.
This work involved the carrying out of condition surveys and safety inspections on a wide range of vessels including fishing boats, which often involved worldwide travel.
Working in co-operation with local surveyors on large damage claims for both Hull and Machinery and P & I Claims Departments.
Carrying out safety and management reviews of both new and existing ship owners.
Providing technical advice to the Underwriting Department.
Called as expert witness in personal injury case.
- 1990 to 1993 Marine Surveyor with Ship Surveys Ltd., promoted Senior Surveyor in 1991. Operating as a Consultant Engineer and Marine Surveyor for a wide range of principles including both Hull and P&I Underwriters.
- 1986 to 1990 Marine Surveyors with Brodrick, Wright & Strong, Consulting Engineers, Ship and Cargo Surveyors. Involving a variety of both cargo and engineering survey work, on a large variety of ships including fishing vessels.
- 1974 to 1986 Marine Engineer with P & O, General Cargo Division, P & O Ferries and Humber Tugs holding various ranks to the level of Second Engineer.
- 1970 to 1974 Engineer cadet with P & O General Cargo Division.
